CORPORATE

Cash and Cash Equivalents

As at 30 June 2020, Tanami Gold NL (“Tanami” or the “Company”) had available cash of \$28.95 million.

Northern Star Resources Limited Shares

As at 30 June 2020, the Company has 500,000 NST shares remaining.

Joint Venture with NST

The respective interests in the Central Tanami Project (CTP) of Tanami and NST at the date of this report remain at 60% and 40%.

During the period, NST have advised that it caused the work listed below to be carried out on the CTP.

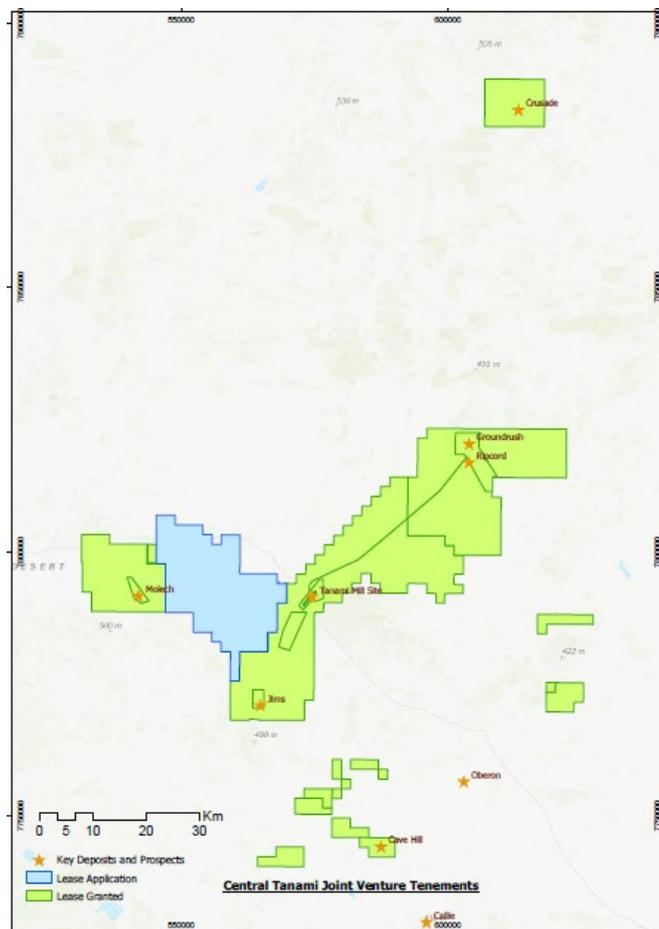

Figure 1 – Central Tanami Joint Venture Tenements

quarterly report

FOR THE PERIOD ENDING 30 JUNE 2020

EXPLORATION

Central Tanami Project (60% Tanami)

NST have advised that:

- a) The Central Land Council (“CLC”) revoked all access permits for entry onto Aboriginal Land on 17 March 2020 due to the COVID-19 pandemic including all permits issued for exploration activities. Accordingly, no on-ground exploration activities were undertaken at the CTP during the quarter. Exemptions were applied for, and received, for several exploration personnel to assist with critical care and maintenance activities at the CTP mine site.
- b) Due to COVID-19 restrictions, activities focussed on desktop projects including resource revisions for the Crusade and Ripcord deposits, tenement assessments and the development of a gold paragenesis and geometallurgy project in partnership with CSIRO and Applied Petrologic Services.
- c) During the quarter, NST assisted the Northern Territory Government’s Operation COVID-Assist by providing catering and accommodation at the CTP for up to twenty personnel from the Australian Defence Force, NT Police and Australian Federal Police. These services are expected to continue until late-July 2020.

Exploration Resource Estimation

NST have advised that:

- a) Crusade and Ripcord

Results from “sighter” 1 metallurgical test samples for Crusade and Ripcord were received during the quarter. The samples tested for both were bulk rejects from the 2019 RC drill program.

The Crusade test samples included a variety of lithologies and oxidation states. Indicative gold recoveries in oxide material averaged 86% and 59% for fresh rock samples, however there is insufficient samples to accurately draw a conclusion on the metallurgical nature of the complete deposit.

Given the limited mineralisation intersected at Ripcord during the 2019 RC drill program, only four metallurgical samples were submitted. Results show an average recovery of 98% for fresh rock mineralisation which is consistent with previous test work on Groundrush style mineralisation. Further resource drilling is required to target the oxide/supergene zone in the north of the deposit.

- b) Geometallurgy Project

During the quarter, Applied Petrologic Services and Research (APSAR), in conjunction with the CSIRO, were engaged to undertake a project to investigate the geometallurgy, gold paragenesis and gold deportment within Tanami Mine Corridor deposits. The aim of the project is to:

- Define metamorphic/metasomatic and hydrothermal alteration framework for gold mineralisation.
- Define and categorise styles of mineral/gold paragenesis and deportment in the context of the above framework; and
- Provide insight into the key processes driving the observed style and type of spatial/temporal variation in gold paragenesis and deportment.

APSAR will focus on petrology from a range of Central Tanami deposits with petrographic thin sections available from over 30 areas across the Central Tanami region with interpretations based on this data and supporting test work. The project will be supported by additional test work by the CSIRO to explore the following:

- (i) Micro-characterisation of gold mineralisation, aiming to identify:
 - Mineral phases containing gold;
 - Gold distribution within minerals identified; and
- (ii) Comparison between deposits.
 - Evaluation of gold distribution and occurrence in combination with deposit-scale rock properties and geology for exploration targeting.

quarterly report

FOR THE PERIOD ENDING 30 JUNE 2020

APSAR commenced work during the quarter, CSIRO are awaiting core samples from site before commencing. These samples cannot be sourced until Northern Star geologists are permitted by the CLC to return to site. Initial results are expected early in the next quarter.

c) Targeting

An assessment of all exploration targets was undertaken during the quarter. This process included the quasi optimisation of near-surface mineralisation in open pit mining scenarios. The design incorporated exploration targeting of multiple areas with previous mineralisation intersections with a core focus around Jims, Groundrush and Hurricane-Repulse Domains

Groundrush Domain

NST have proposed that:

A significant focus of the FY21 exploration program design is the Groundrush domain. To ensure the area is ready for rapid drill evaluation a revision to the current domain 3D geological model was undertaken. This process is ongoing at the end of the quarter; a working model is expected for completion during the next quarter.

Figure 2 shows the current model, detailing the pre-mineralisation intrusives (Tombstone Dolerite, Groundrush Dolerite and Western Dolerite) and post-mineralisation faults (Footwall Fault and unknown)

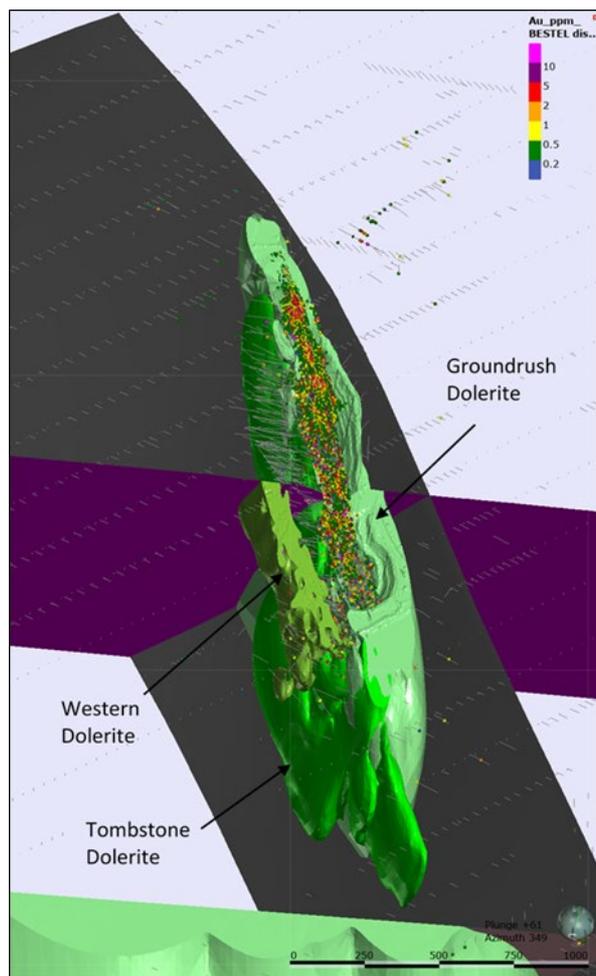

Figure 2 – Groundrush 3D geological model (Oblique view looking NNW)

Earthworks and Rehabilitation

NST have advised that:

quarterly report

FOR THE PERIOD ENDING 30 JUNE 2020

- a) All rehabilitation that was completed in late 2019 and early 2020 has been added to the NSR GIS rehabilitation tracking system that was implemented in April 2020.
- b) As a part of the recent TRE MMP variation, a total of 770 drill holes and 17.68km of track were submitted as rehabilitated and a request made for them to be removed from the security.

NST have advised that:

Planned work for next quarter entails:

- Schedule heritage field surveys as required – review SSCC approval status;
- Review TRE MMP approval status;
- Finalise exploration program design;
- Collect and submit core samples for CSIRO Geometallurgy Project;
- Review Geometallurgy Project preliminary results;
- Complete Jims deposit resource estimation;
- Finalise Groundrush Domain working 3D geological model; and
- Review WA-NT border restrictions and coordinate field program logistics.

MINERAL RESOURCES

Table 1: Tanami Gold NL Mineral Resources as at 30 June 2020 (60% Tanami)

Project	Resource Category											
	Measured			Indicated			Inferred			Total		
	Tonnes	Grade g/t Au	Ounces	Tonnes	Grade g/t Au	Ounces	Tonnes	Grade g/t Au	Ounces	Tonnes	Grade g/t Au	Ounces
CTP ⁹	6,255,000	2.9	579,000	11,075,000	2.8	1,001,000	12,106,000	2.9	1,133,000	29,436,000	2.9	2,713,000
CTP Stockpile ⁹	1,400,000	0.7	31,000	-	-	-	-	-	-	1,400,000	0.7	31,000
Total	7,655,000	2.5	610,000	11,075,000	2.8	1,001,000	12,106,000	2.9	1,133,000	30,836,000	2.8	2,744,000

Notes to accompany Table 1

1. CTP is Central Tanami Project.
2. Resource estimations completed using MineMap, Vulcan, Surpac, Datamine and Micromine software packages comprising a combination of ellipsoidal inverse distance and ordinary kriging grade interpolation methods.
3. Variable gold assay top cuts were applied based on geostatistical parameters and historical production reconciliation.
4. Resources reported above relevant cut-offs based on economic extractions, varying between 0.7g/t Au and 5.0g/t Au block model grade.
5. Stockpile figures from previously reported Otter Gold Mines NL 2001 Mineral Resource estimate less recorded treatment by Newmont Asia Pacific.
6. Tonnes and ounces rounded to the nearest thousand and grade rounded to 0.1g/t Au. Rounding may affect tallies.
7. The information in this report pertaining to Mineral Resources was compiled by Mr Bill Makar (MAusIMM), former Consultant Geologist – Tanami Gold NL, Mr Michael Thomson (MAusIMM), former Principal Geologist for Tanami Gold NL, Mr Steven Nicholls (MAIG), former Senior Geologist for Tanami Gold NL, Mrs Claire Hillyard (MAusIMM), former Resource Geologist for Tanami Gold NL, Mr Mark Drabble (MAusIMM) – Principal Consultant Geologist, Optiro Pty Ltd and Mr Peter Ball (MAusIMM), Director of Datageo Geological Consultants, and Mr Brook Ekers, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of Northern Star Resources Limited. Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard, Mr Drabble, Mr Ball and Mr Ekers have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard, Mr Drabble, Mr Ball and Mr Ekers consent to the inclusion in this report of the matters based on their information in the form and context in which it appears.
8. The dates referred to in this table represents the date of the most recent update of a Resource (ML22934 Groundrush) within this table, all other Mineral Resources except for ML22934 Groundrush remain unchanged.
9. On 4th of August 2015, an unincorporated joint venture (“JV”) was formed between the Company and Northern Star Resources Limited who purchased an initial 25% interest in the Company’s CTP. On 14 September 2018, the Company exercised the first put option available to it under the JV to sell a further 15% in the CTP. As at 30 June 2020, the Company retains a 60% interest in the CTP Resources stated in this table.

Notes to accompany Table 2

- Resource estimations completed using MineMap, Vulcan and Micromine software packages comprising a combination of ellipsoidal inverse distance and ordinary kriging grade interpolation methods.
- Grade estimation was constrained to material within >0.7g/t mineralisation outlines.
- Variable gold assay top cuts were applied based on geostatistical parameters and historical production reconciliation.
- Resources reported above 0.7g/t block model grade.
- Resources reported above 1.0g/t block model grade.
- Stockpile figures from previously reported Otter Gold Mines NL 2001 Mineral Resource estimate less recorded treatment by Newmont Asia Pacific.
- Tonnes and ounces rounded to the nearest thousand and grade rounded to 0.1g/t. Rounding may affect tallies.
- The information in this report pertaining to Mineral Resources for the Central Tanami Project (excluding ML22934 Groundrush) was compiled by Mr Bill Makar (MAusIMM), former Consultant Geologist – Tanami Gold NL, Mr Michael Thomson (MAusIMM), former Principal Geologist for Tanami Gold NL, Mr Steven Nicholls (MAIG), former Senior Geologist for Tanami Gold NL, Mrs Claire Hillyard (MAusIMM), former Resource Geologist for Tanami Gold NL and Mr Peter Ball (MAusIMM), Director of Datageo Geological Consultants. Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard and Mr Ball have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the December 2004 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Makar, Mr Nicholls, Mrs Hillyard and Mr Ball consent to the inclusion in this report of the matters based on their information in the form and context in which it appears.
- ML22934 Resource consists of two Resources - Groundrush Deposit (10.7million tonnes at 3.3g/t for 1,129,000 ounces of gold) and the Ripcord Deposit (1.1 Million tonnes at 2.5g/t for 89,000oz). The information in this report pertaining to Mineral Resources for ML22934 Groundrush was compiled by Mr Brook Ekers, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of Northern Star Resources Limited. Mr Ekers has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Ekers consents to the inclusion in the public report of the matters based on this information in the form and context in which it appears.
- The dates referred to in this table represents the date of the most recent update of a Resource (ML22934 Groundrush) within this table, all other Mineral Resources except for ML22934 Groundrush remain unchanged.

ESTIMATION GOVERNANCE STATEMENT

The Company ensures that all Mineral Resource calculations are subject to appropriate levels of governance and internal controls.

Exploration results are collected and managed by an independent competent qualified geologist. All data collection activities are conducted to industry standards based on a framework of quality assurance and quality control protocols covering all aspects of sample collection, topographical and geophysical surveys, drilling, sample preparation, physical and chemical analysis and data and sample management.

Mineral Resource estimates are prepared by qualified independent Competent Persons. If there is a material change in the estimate of a Mineral Resource, the estimate and supporting documentation in question is reviewed by a suitable qualified independent Competent Persons.

The Company reports its Mineral Resources on an annual basis in accordance with JORC Code 2004 and 2012.

COMPETENT PERSON'S STATEMENT

The information in this report that relates to all Mineral Resources (other than ML22934 Groundrush) is based on information compiled by consultant geologist Mr Michael Thomson of MiGeo Enterprise Pty Ltd. Mr Thomson is a member of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the December 2004 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Thomson consents to the inclusion in this report of the matters based on his information in the form and context in which they appear. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

The information in this report that relates to the Mineral Resource for ML22934 Groundrush is based on information compiled Mr Brook Ekers, a Competent Person who is a full-time employee of Northern Star Resources Limited. Mr Ekers is a member of the Australian Institute of Geoscientists and has sufficient experience which

quarterly report

FOR THE PERIOD ENDING 30 JUNE 2020

is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Ekers consents to the inclusion in this report of the matters based on his information in the form and context in which they appear.

The information in this announcement that relates to exploration results for the Company's Central Tanami Project Joint Venture is based on information compiled by Michael Mulrone, a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Northern Star Resources Limited. Mr Mulrone has sufficient experience that is relevant to the styles of mineralisation and type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" for the Company's Central Tanami Project Joint Venture. Mr Mulrone consents to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(68)
8.2 Capitalised exploration & evaluation (Item 2.1(d))	-
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(68)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	28,945
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	28,945
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	425
8.8	If Item 8.7 is less than 2 quarters, please provide answers to the following questions:
1.	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?
	Answer: N/A
2.	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
	Answer: N/A
3.	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
	Answer: N/A

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 July 2020

Authorised by: Daniel Broughton, Chief Financial Officer
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
